Portfolio: <https://john-dhale-cpe-portfolio.vercel.app/>

OBJECTIVE

Computer Engineering graduate with experience building production-ready full-stack applications using Next.js, TypeScript, React, PostgreSQL, and Supabase. Recently contributed to AI agent evaluation through benchmark task development for Project Mina. Seeking an entry-level Software Engineer or AI Engineer role where I can build scalable systems while expanding my expertise in artificial intelligence.

EDUCATION

Bachelor of Science in Computer Engineering

2022 – June 2026

University of Rizal System - Morong Campus

PROFFESIONAL EXPERIENCE

CLI Agent Data Contributor

Project Mina — Contractor (via Assemble)

June 2026 – Present

- Independently design and author benchmark tasks for Terminal-Bench, an AI agent evaluation system used to test frontier AI coding agents
- Engineer real-life CLI agent tasks calibrated to a narrow acceptance rate, requiring precise difficulty tuning so tasks are genuinely challenging without being unsolvable easily
- Build and validate tasks within a Dockerized environment (WSL2 Ubuntu, Docker Desktop, uv), working independently from task conception through submission
- Developed benchmark tasks contributing to the evaluation of frontier AI coding agents by creating realistic CLI workflows and validating task correctness in Dockerized environments.

IT Support Intern (OJT)

Fusion CX (BPO Company)

June 2025

- Assisted the IT support team in providing basic technical assistance to call center agents
- Supported troubleshooting of common system issues such as login access, application errors, and account concerns
- Helped escalate technical problems to appropriate IT personnel when necessary
- Observed and participated in daily IT support operations in a BPO environment
- Gained hands-on exposure to IT support workflows and corporate technical systems

PROJECTS

AGHAM Setlist – Lineup Scheduler

June 2026

Developer

<https://setlist-agham.vercel.app/>

- Built and deployed a full-stack worship setlist management platform for a church worship team (Currently used by members of a church worship team for weekly service planning)
- Designed relational database schema and API routes for songs, setlists, and setlist sections, including musical metadata (chords, lyrics, key, BPM, time signature)
- Implemented authentication and Row Level Security policies in Supabase for secure multi-user access.
- Integrated the Spotify API to auto-generate a playlist based on the setlist lineup
- Tech: Next.js, TypeScript, Supabase, PostgreSQL, Tailwind CSS

Shepherd – Church Management System

April 2026

Co-Developer / Co-Admin

- Co-developed and co-deployed a production-grade church management system, currently used by a live organization
- Full-featured financial workflows — cash adjustments, opening/closing balances, credit/debit, and audit reporting
- Responsive dashboards, event and calendar management, and membership and department management
- Coordinate with the co-developer and board members on system improvements and new business logic
- Tech: Ruby on Rails, React, PostgreSQL

Personal Portfolio Website

June 2026

Developer

<https://john-dhale-cpe-portfolio.vercel.app/>

- Designed and built a responsive personal portfolio using Next.js, TypeScript, and Tailwind CSS with a custom dark design system, scroll-based animations, and WebGL visual effects to showcase projects and technical background.
- Tech: Next.js, TypeScript, React, Tailwind CSS, Web3form

Sheep Disease Diagnostic System

April 2026

Researcher

- Applied machine learning techniques to build a data-driven diagnostic tool for sheep disease detection, combining research, problem-solving, and intelligent system design for agricultural applications.
- Tech: Python, Deep Learning, Data-Driven Research

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, SQL
- **Frameworks & Libraries:** Next.js, React, Tailwind CSS
- **AI & Machine Learning:** Claude Code, OpenCode, AI Agent Evaluation, Benchmark Task Design, Prompt Engineering
- **Databases:** PostgreSQL, Supabase
- **Developer Tools & Platforms:** Git, GitHub, Vercel, VS Code, Linux (WSL2 Ubuntu), Node.js, Docker
- **Practices:** REST APIs, Row Level Security, Responsive Web Design, Progressive Web Apps, Debugging & Troubleshooting, Agile Collaboration, Version Control, Component-Based Architecture, API Integration, Continuous Learning,
- **Soft Skills:** Technical Communication, Cross-functional collaboration, Analytical thinking, System design

ACHIEVEMENTS

- Graduated with a Bachelor of Science in Computer Engineering (2026)
- Selected as a Project Mina contractor contributing to AI agent benchmark development
- Built and deployed production web applications used by real organizations
